Why Kids Are Excited Here:

Students in fourth grade love engaging in hands-on learning activities and projects that help them become more invested in their education while developing critical thinking and collaboration skills. Each year, they eagerly anticipate visiting Meadowcroft Village and Rock Shelter, and enjoy participating in live virtual field trips with the National Archives and NASA.

Academics:

The fourth-grade curriculum fosters personal growth, comprehension skills, problem-solving and teamwork. Faith building and character education are important components of our classroom. In addition to our rigorous class work, students will complete a project and focus on a book study every nine weeks.

Projects:

- Volcano Project
- Cow eye Dissection
- Bottle biography
- Fifty states postcard challenge
- Float Project
