Why Kids Are Excited Here:

I engage in a range of projects designed to teach children new techniques. This not only boosts their confidence but also ensures they have fun while learning.

Academics:

- Read with adequate accuracy and fluency to enhance understanding.
- Utilize phonics and word analysis skills effectively for decoding words.
- Master telling time and counting money.
- Add and subtract fluently, both with and without regrouping.
- Get ready for first communion and first reconciliation.
- Recognize an expanding number of words by sight.

Projects:

- Class Book: Students as authors and illustrators.
- Growth Mindset: Teach kids to positively navigate challenges.
- Flashlight Friday: Kids read chosen books in the dark with flashlights.
- Book Studies: Opportunities for reading and discussion, guided projects by the teacher.
